ET4x-HC Series

Product Environmental Attributes

Putting Sustainability at the Heart of Our Products

When it comes to creating sustainable products, Zebra is committed. From company-wide global initiatives to the end-to-end product life cycle from manufacturing to retirement, our green initiatives protect the planet—and the people who make and use our products.

ZEBRA

A-to-Z sustainable packaging

Our corrugated packaging is 100% curbside recyclable:

- 95% biodegradable packaging, by weight
- The corrugated box and insert are made using a minimum of 50% recycled content

Lower consumption of devices, accessories and batteries through maximized life cycles

Most carbon emissions occur in the raw material and manufacturing stages—the fewer devices you use, the more you reduce greenhouse gasses

- Maximized lifecycle with Zebra's rugged design
- 6 years of security: keep your devices secure every day of their long life cycle with LifeGuard™ for Android™[3]
- 6 years of repair and technical support: no need to retire working devices due to lack of available support[3]
- The ET4x-HC ShareCradle supports backward compatibility with legacy ET5x charging accessories. The purchase of the adapter cup and T-adapter for the appropriate device is required
- No lost devices to replace: Device Tracker locates devices when lost or misplaced
- Reduced spare device pool: no-cost Mobility DNA™ troubleshooting tools keep devices on-site and in the hands of your workers—instead of the service center

Eco-friendly attributes[5]

- No mercury
- No PFO/PFOAs
- No latex
- Compliant with global RoHS requirements

mercury-free | latex free | RoHS COMPLIANT | PFOA FREE

Power consumption

- 59% below allowable Energy Star energy consumption levels[1]
- Fast charging in just 1 hour, 43 minutes[4]
- Zebra Technologies external power supplies meet US Department of Energy (DoE) Level VI and all international efficiency requirements

Use fewer device types

Zebra solutions provide 5-in-1 true device convergence—the ET40/45-HC also has an integrated scanner, push-to-talk capability, NFC payments and can replace a workstation, substantially reducing plastics and electronics volumes, as well as cost

Advanced NFC reading

- Avoid the spread of germs: the most complete Android NFC reading enables NFC contactless transactions like ticketing and payment
- Reduced waste from eliminating physical tickets

Green battery technology

- Removable, easy to recycle battery
- Reduced spare battery pool: all day battery run time[2], plus visibility into battery health to ensure that all batteries can hold a full charge
- Zebra Charge Manager allows more efficient charging and longer battery lifetime

Zebra's Circular Economy provides life-cycle management of products that reduce your overall carbon impact

Takeback Recycling Program
Zebra offers free recycling for selected end of life devices and will provide a certificate of destruction upon request. Conditions apply

Device Buy-Back Program
Your end of life devices may be eligible for a device buy-back, enabling a "green" upgrade to the next generation device

Certified Refurbished Device Program
Purchase or rent Certified Refurbished devices, which perform like new and may include end of life products to meet season surges and bridge the gap to a tech refresh

Battery Recycling Services
We offer a variety of options, depending on location, from convenient drop-off locations to complete a-to-z battery management, where Zebra handles it all for you. Conditions apply
