MC33XX Series
Product Environmental Attributes

Putting Sustainability at the Heart of Our Products

When it comes to creating sustainable products, Zebra is committed. From company-wide global initiatives to the end-to-end product life cycle from manufacturing to retirement, our green initiatives protect the planet—and the people who make and use our products.

ZEBRA

A-to-Z sustainable packaging

Our corrugated packaging is 100% curbside recyclable:

- 87% biodegradable packaging, by weight
- The cardboard box is made from 50% recycled content
- All paper is non-bleached and contains 50% recycled content

Advanced NFC reading[6]

- Avoid spread of germs: The most complete Android™ NFC, reading enables NFC contactless transactions like ticketing and payment
- Reduced waste from eliminating physical ticket

Eco-friendly attributes[5]

- No halogens
- No mercury
- No PFO/PFOAs
- No latex
- Compliant with global RoHS requirements

Life cycle analysis for proven sustainability

Cradle-to-grave analysis allows Zebra to understand and continuously improve the MC33XX's impact on the climate; results are summarized in the environmental product data sheet

Green battery technology

- Removable, easy to recycle battery
- Reduced spare battery pool: long 31+ hour[2] battery run time, plus visibility into battery health to ensure that all batteries can hold a full charge
- Zebra Charge Manager allows more efficient charging and longer battery lifetime

Lower consumption of devices, accessories and batteries through maximized life cycles

Most carbon emissions occur in the raw material and manufacturing stages—the fewer devices you use, the more you reduce greenhouse gasses

- Maximize lifecycle with Zebra's rugged design
- 10 years of security: keep your devices secure every day of their long life cycle with LifeGuard™ for Android[4]
- 10 years of repair and technical support: no need to retire working devices due to lack of available support[4]
- Compatible with other Zebra devices, the existing charging accessories can be reused with the next generation devices
- No lost devices to replace: Device Tracker locates devices when lost or misplaced even when the battery is depleted
- Reduced spare device pool: no-cost Mobility DNA™ troubleshooting tools keep devices on-site and in the hands of your workers—instead of the service center

Power consumption

- 10%+ more power efficient—even with a faster processor and advanced features[1]
- Zebra Technologies external power supplies meet US Department of Energy (DoE) Level VI and all international efficiency requirements

Use fewer device types

Zebra solutions provide 3-in-1 true device convergence—the MC33XX can also function as a 2-way radio and PBX handset, substantially reducing plastics and electronics volumes, as well as cost

---

Zebra's Circular Economy provides life cycle management of products that reduce your overall carbon impact

Takeback Recycling Program
Zebra offers free recycling for selected end of life devices and will provide a certificate of destruction upon request. Conditions apply

Device Buy-Back Program
Your end of life devices may be eligible for a device buy-back, enabling a 'green' upgrade to the next generation devices

Certified Refurbished Device Program
Purchase or rent Certified Refurbished devices, which perform like new and may include end of life products, to meet season surges and bridge a gap to a tech refresh

Battery Recycling Services
We offer a variety of options, depending on location, from convenient drop-off locations to complete a-to-z battery management, where Zebra handles it all for you. Conditions apply
