ZEBRA CAPTURE YOUR EDGE

EMPOWERING LAW ENFORCEMENT:

Advancing the effectiveness of public safety protection & response

Creating data-powered environments that provide actionable intelligence

Transforming law enforcement with actionable intelligence

Police officers must act quickly and decisively in fast-paced, ever-changing situations. With the power of secure, connectivity public safety devices, law enforcement will have access to an abundance of data-rich applications that aid in solving crime and keeping officers and the communities they serve safe.

Rugged, reliable, mobile technology is key to enabling critical capabilities in routine and emergency situations.
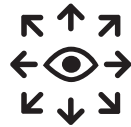

Elevating situational awareness

Give officers at the scene the mission-critical intelligence they need to better shape outcomes and ensure safety. With rugged devices and real-time reporting, officers can quickly check license plates, issue summons, execute warrants, view and stream live video and photos and get detailed information of active and potential threats.

Enabling effective communications and collaboration

Supplement critical voice services with dependable LTE devices and enable teams to collaborate more effectively, share audio, photos/video and data in extreme environments – while in transit or at the scene.

Automating paper-based tasks

Save time and increase accuracy with broadband devices that enable public safety and parking enforcement officers to file electronic reports in the field, issue electronic tickets for traffic, parking, permit and other on the spot fines in minutes, while eliminating errors and cumbersome paperwork.

Tracking critical resources

Prepare to better handle virtually any situation with real-time information about the location and status of personnel and equipment. Rugged, mobile devices must effectively operate in harsh conditions and enable crews to easily input data, access databases and share data between command staff and officers in the field.

Empowering fast, effective emergency management

Count on reliable, broadband devices to help in emergency and disaster situations in tracking victims and evacuees and deploying appropriate resources to meet rescue and restoration needs.

Connecting first responders to critical information when seconds count

Zebra's law enforcement technologies include handheld computers, tablets, scanners and printers. With tracking and barcoding capabilities, our devices help maintain secure perimeters and increase visibility and situational awareness. Zebra's first responder technology can accurately track personnel, gear and evacuees, as well as view scenes en route as events unfold.

Zebra law enforcement mobile solutions:

Award-winning handheld computers

Officers appreciate the simplicity of the TC57/TC77 Android operating system, trouble-free reliability and device construction that can withstand drops into water or on to concrete, use in dusty areas and out in the rain and snow. Certified to meet Public Safety Network standards, the TC57/TC77's have a 14/15-hour battery life with warm swap mode. Features include multiple programmable buttons, including Push-to-Talk and scanning.

A variety of tablet form factors

Police prefer smaller, lighter mobile computing tools to cumbersome laptops. Zebra's portfolio of high-performance tablets — the L10 Series, ET56 and XSLATE R12 — feature bright screens that are easy to read in bright sunlight, a durable design that complies with MIL-STD-810G to withstand harsh treatment and provide outstanding roaming and connectivity. Certified to meet Public Safety Network standards, departments can select the level of durability, display size, form factor, processing power and accessories to ensure the right tools for the mission.

Rugged mobile printers for on the spot fines and tickets issued by officers

The demands of law enforcement require printer solutions that are rugged, weather- and temperature-resistant and reliable. Zebra mobile printing solutions help law enforcement focus on their jobs instead of the paperwork. They include the ZQ320 and ZQ520 printers that allow officers to issue tickets in minutes, accurately, securely and safely.

Control and visibility are in our DNA

Zebra devices provide law enforcement personnel with the visibility and control they need to manage their deployed assets and ensure readiness and uptime, all the time. The unique Zebra Mobility DNA software ecosystem transforms Android, the world's most popular consumer operating system, into an enterprise-ready force that heightens productivity, simplifies management and eases integration. Zebra VisiblityIQ™ Foresight analytics solution provides a single view of device availability and asset utilisation for optimum productivity and ROI.

Support and services

Maximise uptime and performance of your Zebra devices with OneCare support services that set the bar for troubleshooting, support and repair. No matter what level of service you need, there's a Zebra OneCare service to support your critical operations and help improve productivity.

Committed to the public safety mission

Zebra works with public safety agencies, helping connect police officers with each other and critical data. We offer a robust portfolio of mobile solutions for secure communication and to enable digital capture of efficient workflows. You can count on us to deliver an ecosystem of devices and accessories to enhance performance – from the everyday to the extreme.
